Section 1. Identification of the Substance and Company

1.1 Product Identification:
Product Name: Tonimet Nickel
Synonyms: Tonimet® granule, Tonimet® Briquette, Tonimet® compact
Chemical Family: Metal

EC No: 231-111-4
CAS No: 7440-02-0
REACH Registration number: see Section 3

1.2 Uses
Identified Uses:
- Stainless, special steels and special alloys manufacturing
- Integrated steel and iron
- EAF carbon steel manufacturing
- Production of brazing alloys
- Use of nickel metal and nickel containing alloys for the production of steel and other alloys powder by atomisation.

Uses Advised Against:
- Use of nickel in articles intended for direct and prolonged contact with the skin where the release of nickel exceed the limit set out in Directives 94/27/EC and 2004/6/EC and REACH regulation 1907/2009 (Annex XVII).
- Use of nickel in nickel-containing food contact materials for which migration into foodstuff would exceed more than 0.1 mg/kg of nickel in accordance with the Council of Europe Guidelines on metals and alloys used as food contact materials (2002)
- Use of nickel in immersion-type kettles which would release more than 0.05 mg/l of nickel into the water in accordance with the Council of Europe Guidelines on metals and alloys used as food contact materials (2002)
- Use of nickel in commercially available “do-it-yourself” home electroplating kits.

Exposure Scenarios: See Annex 1

1.3 Company Identification
Vale Europe Limited
Clydach, Swansea
SA6 5QR
msds@vale.com
REACH@vale.com

Telephone Number: +44 (0) 1792 842501

For Fire, Spill, or chemical emergency call CHEMTREC: +44 (0) 870-8200418
Section 2. Hazards Identification

2.1 Classification of the Substance:

2.1.1 Classification according Regulation (EC) No. 1272/2008
- Skin Sensitization – Category 1
- Respiratory Sensitization – Category 1
- Carcinogenicity – Category 1A
- Specific Target Organ Toxicity, Repeated exposure – Category 1

Hazard Pictograms: GHS07 - Exclamation mark, GHS08 - Health Hazard

Signal Word: Danger

Hazard Statements:
- H317 - May cause an allergic skin reaction.
- H334 - May cause allergy or asthma symptoms or breathing difficulties if inhaled.
- H350 - May cause cancer by inhalation
- H372 - Causes damage to lungs through prolonged or repeated inhalation exposure

Precautionary Statements:

2.2: Label elements
Labelling according to Regulation (EC) No 1272/2008

Product identifier: Tonimet
Contains: Nickel [7440-02-0] 93.97% Cobalt [7440-48-4] 1.3%

Symbols: GHS07 - Exclamation mark, GHS08 - Health Hazard

Signal Word: Danger

Hazard Statements: H317, H334, H350, H372

Precautionary Statements P202, P261, P280, P284, P302+352, P501
(NOTE: P-statements has been reduced as per CLP regulation, the full list can be found in Section 15).

For full text of Precautionary statements see section 15.

2.3: Other Hazards
The PBT and vPvB criteria of Annex XIII of the REACH regulation does not apply to inorganic substances, such as nickel metal.

**Section 3. Composition**

- **Substance**: Yes
- **Mixture (SVHC)**: No

**Tonimet Granule:**

REACH Registration #’s:
01-2119438727-29-xxxx – Vale Japan Limited (Vale Europe Limited acting as Only Representative)

**Section 4. First Aid Measures**

*Ingestion:* No specific first aid required.

*Inhalation:* IF INHALED: Remove person to fresh air and keep comfortable for breathing. If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician.

*Skin:* IF ON SKIN: Wash with plenty of water. Remove contaminated clothing, and wash affected areas thoroughly with water. If skin irritation or rash occurs: Get medical advice/attention. Show label if possible.

*Eyes:* Irrigate eyeball thoroughly with water for at least 10 minutes. If discomfort persists seek medical attention.

Most important symptoms and affects, both acute and delayed
- Inhalation: Cough, sore throat, wheezing, increased difficulty in breathing.
- Skin contact: Rash
- Eye contact: Redness

*Indication of immediate medical attention and special treatment needed* No special requirements

**Section 5. Fire Fighting Measures**

*Suitable extinguishing media:* Any, type to be selected according to materials stored in the immediate neighbourhood.

*Special risks:* Non-flammable. May oxidize to Nickel Oxide if exposed to high temperatures within a fire. Keep containers cool with water spray.

*Special protective equipment for fire fighting:* None needed. Wear protective equipment if required for other materials within the immediate vicinity.
Section 6. Accidental Release Measures

Person related precautionary measures: Avoid generation of dusty atmospheres. Do not inhale dusts. Contaminated work clothing should not be allowed out of the workplace. Use personal protective equipment as required. Wash hands, and face thoroughly after handling.

Environmental Protection measures: No specific measures needed.

Procedures for cleaning/absorption: Pick up and replace in original container. Nickel-containing material is normally collected to recover nickel values.

Section 7. Handling and Storage

7.1 Precautions for Safe Handling: Provide adequate ventilation. Do not inhale dust. Wear appropriate nationally approved respirators if handling is likely to cause the concentration limits of airborne particulates to exceed the locally prescribed exposure limits. Wear suitable protective clothing and gloves. Contaminated work clothing should not be allowed out of the workplace. Do not eat, drink or smoke when using this product.

7.2 Conditions for Safe Storage: Store locked up. Keep in the container supplied, and keep container closed when not in use. Local regulations should be followed regarding the storage of this product.

Section 8. Exposure Controls / Personal Protection

8.1.1 Exposure Limits:

8.2.1 Occupational exposure controls:

As supplied, this product does not pose a health hazard by inhalation. Mechanical extraction ventilation may be required if user operations change it to other physical or chemical forms, whether as end products, intermediates or fugitive emissions, which are inhalable. Maintain airborne nickel levels as low as possible. Avoid repeated skin contact.

PPE

Respiratory protection: If required, use an approved respirator with particulate filters.

Eye protection: None

Hand & Skin Protection: Wear suitable protective clothing and gloves, which should be selected specifically for the working place, depending on concentration and quantity of the hazardous material (overalls and leather/rubber gloves). Wash skin thoroughly after handling and before eating, drinking or smoking. Change contaminated clothing frequently. Launder clothing and gloves as needed. Use of skin-protective barrier cream advised.

### Section 11. Toxicological Information

As a mixture the toxicological properties of this product are unknown. The toxicology of the reported ingredients are summarized below.

**Nickel**

**Acute Toxicity:**

a) **Oral:** Non toxic - LD$_{50}$ ORAL RAT >9000 mg/kg
b) Inhalation: No information available

c) Dermal: No information available.

Corrosivity/Irritation:

a) Respiratory Tract: None

b) Skin: See sensitization section.

c) Eyes: Mechanical irritation may be expected.

Sensitization:

a) Respiratory tract: Nickel metal induced asthma is very rare. 3 case reports are available; the data is not sufficient to conclude that nickel metal is classified as a respiratory sensitizer.

b) Skin: Nickel metal is a well-known skin sensitizer. Direct and prolonged skin contact with metallic nickel may induce nickel allergy and elicit nickel allergic skin reactions in those people already sensitized to nickel, so called nickel allergic contact dermatitis.

c) Pre-existing conditions: Individuals known to be allergic to nickel should avoid contact with nickel whenever possible to reduce the likelihood of nickel allergic contact dermatitis reactions (skin rashes). Repeated contact may result in persistent chronic palmar/hand dermatitis in a smaller number of individuals, despite efforts to reduce or avoid nickel exposure.

Chronic toxicity:

a) Oral: No information available

b) Inhalation: Animal studies (rats) show that repeated dose inhalation of nickel damages the lung. Chronic inflammation, lung fibrosis and accumulation of nickel particles were observed.

c) Dermal: Direct and prolonged skin contact with nickel metal may cause nickel sensitization resulting in nickel allergic contact dermatitis /skin rash.

Mutagenicity / Reproductive toxicity: No data.

Carcinogenicity:

a) Ingestion: The U.S. National Institute for Occupational Safety and Health (NIOSH) concluded that there is no evidence that nickel metal is carcinogenic when ingested.

b) Inhalation: To date, there is no evidence that nickel metal causes cancer in humans based on epidemiology data from workers in the nickel producing and nickel
consuming industries. A recent animal (rat) inhalation study showed no increased respiratory cancer risk for nickel metal powder indicating that no carcinogen classification is warranted for nickel metal. The U.S. National Toxicology Program has listed metallic nickel as reasonably anticipated to be a human carcinogen.

The International Agency for Research on Cancer (IARC) (Vol 49) found there was inadequate evidence that metallic nickel is carcinogenic to humans but since there was sufficient evidence that it is carcinogenic to animals, IARC concluded that metallic nickel is possibly carcinogenic to humans (Group 2B). In 1997, the ACGIH categorized elemental nickel as: A5 "Not Suspected as a Human Carcinogen". Epidemiological studies of workers exposed to nickel powder and to dust and fume generated in the production of nickel alloys and of stainless steel have not indicated the presence of a significant respiratory cancer hazard.

**Nickel Oxide**

**Acute Toxicity:**

*a) Oral:* Non toxic - \(LD_{50}\) ORAL RAT >11,000 mg/kg (green); 9,990 (black)

*b) Inhalation:* Non toxic - \(LD_{50}\) INHAL RAT >5.08 mg/m\(^3\) (green); >5.15 mg/m\(^3\) (black)

*c) Dermal:* No information available.

**Corrosivity/Irritation:**

*a) Respiratory Tract:* No classification

*b) Skin:* Not corrosive/irritating.

*c) Eyes:* Mildly irritating.

**Sensitization:**

*a) Respiratory tract:* Nickel metal induced asthma is very rare. 3 case reports are available; the data is not sufficient to conclude that nickel metal is classified as a respiratory sensitizer.

*b) Skin:* Ni oxide is currently classified as a dermal sensitizer (R43) according to the 1st ATP to the CLP Regulation. Recent studies evaluating the bioaccessibility of a series of Ni compounds in synthetic sweat indicated very low nickel ion release from Ni oxide suggesting very low or no sensitization potency. Early Guinea pig maximization and Beuhler test results show low potential for nickel oxide to act as a dermal sensitizer.

*c) Pre-existing conditions:* Individuals known to be allergic to nickel should avoid contact with nickel whenever possible to reduce the likelihood of nickel allergic contact dermatitis reactions (skin rashes). Repeated contact may result in persistent chronic palmar/hand dermatitis in a smaller number of individuals, despite efforts to reduce or avoid nickel exposure.
Chronic toxicity:

a) Oral: No information available.

b) Inhalation: Exposure related toxicities were noted following 13 weeks and two years of exposure to NiO in both rats and mice in the US NTP chronic rat inhalation study. Adverse effects in rodents were primarily limited to the lung (e.g., increased tissue weight, inflammation, macrophage hyperplasia). The LOAEC from the chronic study in rats was 0.6 mg NiO/m³ or 0.5 mg Ni/m³.

c) Dermal: No information available.

Mutagenicity / Reproductive toxicity: Not classified for reproductive/developmental toxicity. Not classified for mutagenicity.

Carcinogenicity:

a) Ingestion: No information available. Not classified

b) Inhalation: Cat. 1A; Human epidemiological and animal data suggest that at least some forms of nickel oxide can be carcinogenic to the respiratory tract of humans after inhalation.

Cobalt

Acute Toxicity:

a) Oral: LD₅₀ ORAL RAT 550 mg/kg. Acute Tox. 4; Harmful if swallowed.

b) Inhalation: Low acute toxicity. Main Symptoms: cough, sore throat, wheezing, increased difficulty in breathing.

c) Dermal: LD₅₀(Dermal) >2000mg/kg. Low acute toxicity.

Corrosivity/Irritation

a) Respiratory Tract: None

b) Skin: No data. Not classified. See sensitization section.

c) Eyes: Low acute toxicity. Main Symptoms: Redness.

Sensitization

a) Respiratory tract: Resp. Sens. 1; May cause allergy or asthma symptoms or breathing difficulties if inhaled.

b) Skin: Skin Sens. 1; May cause an allergic skin reaction. Repeated contact with metallic cobalt can cause cobalt sensitivity and allergic skin rashes.

c) Pre-existing conditions: Sensitized individuals may experience an allergic skin rash or asthma.

Chronic Toxicity

a) Oral: No information available.

b) Inhalation: No information available.
c) Dermal: No information available.

**Mutagenicity / Reproductive Toxicity:**
There is no evidence of mutagenic potential. Reproductive toxicity category 2; Suspected of damaging fertility. Specific effect: fertility impairment in males.

**Carcinogenicity**
- **a) Ingestion:** No data. Not classified.
- **b) Inhalation:** Carcinogenicity category 1B; May cause cancer by inhalation.

**Specific Target Organ Toxicity:**
- **a) Single Exposure:** None anticipated.
- **b) Repeated Exposure:** None anticipated.

**Aspiration Hazard:** None.

### Section 12. Ecological Information

12.1 **Toxicity**
Not classified as aquatic to the environment

12.2 **Persistence and degradability**
The PBT and vPvB criteria of Annex XIII to the Regulation does not apply to inorganic substances, such as nickel metal. The methods for determining the biological degradability are not applicable to inorganic substances.

12.3 **Bioaccumulative potential**
Nickel does not tend to bioaccumulate or biomagnify in aquatic or terrestrial systems.

12.4 **Mobility in soil**
The substance is essentially insoluble in water.

12.5 **Results of PBT and vPvB assessment**
Not classified as PBT or vPvB.

12.6 **Other adverse effects**
None anticipated.

### Section 13. Disposal Considerations

13.1 **Waste treatment methods**
Recover or recycle if possible. Dispose of contents in accordance with local, state or national legislation.

13.2 **Additional Information**
No information available.
Section 14. Transport Information

Section 15. Regulatory Information

Europe:
Classification according to Part 3 of Annex VI of EU Regulation No. 1272/2008
Skin Sensitization – Category 1
Respiratory Sensitization – Category 1
Carcinogenicity – Category 1A
Specific Target Organ Toxicity, Repeated exposure – Category 1

Symbols: GHS07 - Exclamation mark, GHS08 - Health Hazard

Signal Word: Danger

Hazard Statements:
H317 - May cause an allergic skin reaction.
H334 - May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H350i – May cause cancer via inhalation
H372 - Causes damage to lungs through prolonged or repeated inhalation exposure

Precautionary Statements:
Prevention:
P201 - Obtain special instructions before use
P202 - Do not handle until all safety precautions have been read and understood
P260 - Do not breathe dust or fume
P261 - Avoid breathing dust or fume
P264 - Wash hands, and face thoroughly after handling.
P270 - Do not eat, drink or smoke when using this product.
P272 - Contaminated work clothing should not be allowed out of the workplace.
P280 - Wear protective gloves and protective clothing
P284 - In case of inadequate ventilation wear respiratory protection.

Response:
- P302+P352 - If on skin: Wash with plenty of soap and water.
- P304+P340 - IF INHALED: Remove person to fresh air and keep comfortable for breathing.
- P308+P313 - If exposed or concerned: Get medical advice/attention.
- P314 - Get medical advice/attention if you feel unwell.
- P333+P313 - If skin irritation or rash occurs: Get medical advice/attention.
- P342+P311 - If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician.
- P362+P364 - Take off contaminated clothing and wash it before reuse.

Storage:
- P405 - Store locked up

Disposal:
- P501 - Dispose of contents/container in accordance to local, regional, national and international regulations

Canada:
- WHMIS Classification: D2A
- All components are listed on the Canadian Domestic Substances List (DSL)

United States of America:
- This product contains Nickel, which is subject to the reporting requirements of Section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 and of 40 CFR 372. Refer to the Hazardous Ingredients section of this MSDS for the appropriate CAS numbers and percent by weight.
- All components are listed on the US Toxic Substances Control Act (TSCA) inventory

Australia:
- Classified as Hazardous according to ASCC criteria
- All components are listed on the Australian Inventory of Chemical Substances (AICS)

P.R. Korea:
- All components are listed in the Korean Toxic Substances Control Act inventory; KE-25818

Philippines:
- All components are listed in the Philippine Inventory of Chemicals and Chemical Substances (PICCS)

Japan:
- All components are listed in the Japanese Handbook of Existing and New Chemical Substances.

P.R. China:
- All components are listed in the Inventory of Existing Substances in China (IECSC).
Section 16. Other Information

Indications of change

1.0 – Original document
2.0 – Update classification as a result of cobalt metal classification changes
